

# Abrupt worsening of occult IgA nephropathy after the first dose of SARS-CoV-2 vaccination

Yoko Fujita<sup>1</sup> · Keisuke Yoshida<sup>1</sup> · Daisuke Ichikawa<sup>1</sup> · Yugo Shibagaki<sup>1</sup> · Masahiko Yazawa<sup>1</sup> 

- Past medical history of occult blood by urine dipstick test without diagnosis.
- 9 days after the vaccination, marked thrombocytopenia and gross hematuria appeared.

Nephrologists **should pay more attention to patients** who develop/exacerbate kidney diseases **after receiving the SARS-CoV-2 vaccine**
